1. PURPOSE

Carrier Wheels Pvt. Ltd. ("CWPL") is committed to preventing air pollution and minimizing emissions arising from its operations.

This Policy establishes CWPL's framework for identification, control, monitoring, and continual improvement of air emissions, ensuring compliance with regulatory requirements and protection of the environment and human health.

2. SCOPE & APPLICABILITY

This Policy applies to:

- All manufacturing and support operations
- All equipment and activities that may generate air emissions
- All employees, contractors, and service providers

It covers:

- Combustion-related emissions
- Process-related emissions
- Fugitive emissions
- Transport and material handling–related emissions

3. POLICY COMMITMENT

CWPL commits to:

- Complying with all applicable air pollution and environmental regulations
- Meeting conditions specified under Consent to Establish (CTE) and Consent to Operate (CTO) issued by the State Pollution Control Board
- Preventing and minimizing air pollution at source
- Implementing appropriate pollution control and preventive measures
- Continually improving air emissions management practices

4. IDENTIFICATION OF AIR EMISSION SOURCES

CWPL identifies air emission sources through its Environmental Aspect–Impact Register. Key emission sources include:

4.1 Stationary Combustion Sources

- Diesel Generator (DG) sets
- Other fuel-based stationary equipment, where applicable

Zoho Sign Document ID: DF932DC14-SS579IIYDPHQNL63KZ7FOOD_0CKAYCFFSZXJ9HI14I4

4.2 Mobile Combustion Sources

- Company-owned or operated vehicles
- Material handling and transport activities

4.3 Process & Operational Emissions

- Welding and fabrication activities (fumes, particulates)
- Handling of materials that may generate dust

4.4 Fugitive Emissions

- Refrigerant leakage from air-conditioning and cooling equipment
- Minor incidental emissions during maintenance activities

5. AIR POLLUTION CONTROL MEASURES

CWPL implements the following control and preventive measures:

Stationary Sources

- Maintenance of DG sets and equipment as per manufacturer recommendations
- Operation of equipment within approved limits
- Compliance with stack height and emission requirements as per CTO

Mobile Sources

- Regular maintenance of vehicles
- Avoidance of unnecessary idling
- Encouragement of fuel-efficient driving practices

Process & Workplace Controls

- Good housekeeping practices
- Adequate ventilation in work areas
- Use of appropriate PPE where required

Fugitive Emissions

- Periodic inspection and maintenance of refrigeration and cooling systems
- Prompt repair of leaks

Zoho Sign Document ID: DF932DC14-SS579IIYDPHQNL63KZ7FOOD_0CKAYCFFSZXJ9HI14I4

6. LINKAGE WITH ENERGY & CLIMATE MANAGEMENT

CWPL recognizes that air emissions are closely linked to energy use.

Air emission reduction is supported through:

- Efficient fuel use
- Reduction of unnecessary energy consumption
- Adoption of cleaner and more efficient technologies
- Use of renewable energy (e.g. solar power) where feasible

These actions also contribute to reducing Scope 1 and Scope 2 GHG emissions, as identified in CWPL's emissions inventory.

7. MONITORING & COMPLIANCE

CWPL ensures that:

- Air emission–related compliance conditions under CTO are followed
- Records related to fuel consumption and equipment operation are maintained
- Air pollution risks are reviewed periodically through internal checks

Monitoring requirements are carried out as per regulatory obligations and operational feasibility.

8. ROLES & RESPONSIBILITIES

Management

- Provide oversight and resources for effective air pollution control

EHS / HR / Admin / Maintenance Functions

- Ensure compliance with air pollution norms
- Monitor emission sources and control measures
- Maintain records and coordinate regulatory interactions

Employees & Contractors

- Follow operational and safety instructions
- Report visible emissions, leaks, or abnormal conditions

9. TRAINING & AWARENESS

CWPL:

- Promotes awareness on air pollution prevention and control
- Informs employees about emission sources and good practices

Zoho Sign Document ID: DF932DC14-SS579IIYDPHQNL63KZ7FOOD_0CKAYCFFSZXJ9HI14I4

- Encourages responsible behavior to minimize air pollution

10. TARGETS & CONTINUAL IMPROVEMENT

CWPL strives to:

- Maintain compliance with all air emission regulatory requirements
- Reduce avoidable emissions through efficient operations
- Improve fuel and energy efficiency
- Review air emission risks and controls periodically

Targets are reviewed based on:

- Operational data
- Regulatory requirements
- Feasibility and business needs

11. INCIDENT & NON-COMPLIANCE MANAGEMENT

Any incident related to abnormal emissions or non-compliance shall be:

- Reported internally
- Investigated for root cause
- Addressed through corrective and preventive actions

12. POLICY REVIEW

This Policy shall be reviewed periodically to:

- Reflect changes in operations or regulations
- Improve effectiveness of air emission controls
- Align with CWPL's environmental and climate commitments

13. APPROVAL & EFFECTIVE DATE

This Air Emissions & Pollution Control Policy is approved by the Management of Carrier Wheels Pvt. Ltd. and is effective from the date of issue.
